TECHNICAL DATA SHEET

SOVA Reconstructive Agent

Article No. 10 I 30070

Product description

Highly effective, ready-to-use sanitising solution with a broad spectrum of activity for cleaning and disinfecting surfaces infested with bacteria, fungi, algae and yeast.

Properties

- Water-dilutable.
- Low odour.
- Wide spectrum of activity against microorganisms.

Fields of application

For the treatment of outdoor surfaces infested with algae and fungi and of indoor surfaces infested with fungi.

Substrate

Substrates must be stable and dry. Remove loose material entirely before applying SOVA Sterilising Agent and do not repair with suitable materials before conclusion of the treatment.

Application

SOVA Reconstructive Agent is ready for use. Apply copiously to infested areas by brush or roller until the area is completely wetted, and allow to work in for at least 12 hours. Then thoroughly remove the eliminated growth mechanically, e.g. by high-pressure cleaner or steam jet (observe legal regulations). Once the substrate is fully dry (after approx. 12 hours), apply SOVA Reconstructive Agent again and allow to work in for at least another 12 hours. It is not necessary to wash the surface again. Prime with SOVA Primer W or SOVA Primer L, if necessary to equalise different levels of absorbency of the repaired areas or to solidify crumbling substrates. The surface can then be provided with an algaecidal and fungicidal topcoat (outdoors) or with a fungicidal topcoat (indoors). Drying time: superficially dry after approx. 6 hours at +20 °C and 65 % rel. humidity. F ull efficacy is achieved after approx. 12 hours. Low temperatures and high air humidity slow down the drying process accordingly.

Consumption

Approx. 150-200ml / m² / application

These figures are average values. The actual consumption depends on the application method used and the nature of the substrate. Carry out a test application to determine the exact consumption rates.

Technical information

Active substances < 2.5 % diethylene glycol

< 2.5 % quaternary ammonium compounds,

benzyl-C8-18-alkydimethyl chloride

Colour transparent yellowish

These figures are average values. The actual values of product deliveries may vary slightly due to the use of natural raw materials in our products.

TECHNICAL DATA SHEET

SOVA Reconstructive Agent

Article No. 10 I 30070

Safety

Use biocides safely. Always read label and product information before use.

This product is not subject to labelling in accordance with the applicable EU Directive. Observe safety data sheet. <u>Safety advice:</u> S2 Keep out of the reach of children. S24/25 Avoid contact with skin and eyes. S29 Do not empty into drains.

Delivery form	10 l plastic canister 450 ml plastic bottle
Storage	Cool and frost-free. Storage stability in original container: approx 12 months. Once opened, seal containers airtight and use up quickly.
Cleaning of tools	With water immediately after use.
Disposal	Only recycle completely empty containers. Dispose of dried material residues as construction waste. Disposal of unused product: EWC No. 080112.
Product code	M-GF 01

Technical support

Should you have any questions, please contact our sales service or technical advisory service.

Our application-related recommendations, which are based on our experience and are given to the best of our knowledge, are not binding and neither constitute a contractual legal relationship nor give rise to ancillary obligations from the purchase contract. The recommendations given do not exempt the customer from independently checking whether our products are suitable for the intended purpose. Our General Terms of Business apply.
